

RAINFIT®

Rainfit Roofwater Systems are broadly used for collection and conveyance of rainwater. These specifically include storage in tanks and pits, recharging borewells, shafts and wells; and augmenting the underground water table through a proper mechanism to percolate into the soil.

- Pipes:
 - Half Round Pipes (uPVC): 140, 180, 250 mm
 - Downtake Pipes (uPVC): 75, 110, 160 mm
- Fittings: (PP) 75, 110, 140, 160, 180, 250 mm

FEATURES

Advanced system design ensures effective collection of roof water and efficient discharge

High mechanical and chemical strength can withstand aggressive environment

Light weight, easy to handle, store and transport

UV stabilized - can be installed in areas directly exposed to sunlight

Smooth and glossy appearance gives it an attractive look
